Tier II - Products that Disinfect Against Human Coronavirus

As of March 13, EPA is supporting the use of products that have demonstrated efficacy against another human coronavirus similar to SARS-CoV-2 on its List N, Disinfectants for Use Against SARS-CoV-2. In other words, the product has not proven that it can kill harder to kill viruses than SARS-CoV-2, which would be a Tier I product, but it can kill viruses like SARS-CoV-2. CBC therefore has amended its list to include a Tier II listing of products that state that they can disinfect human coronavirus.

EPA recommendation is that only if a product with an emerging viral pathogen claim is not available, use a product that will disinfect against human coronavirus.

As a public service, CBC is maintaining this list of antimicrobials that have proven to be effective against stronger pathogens, such as norovirus or ebola. By publishing and maintaining this open list, CBC relieves federal, state, and local health officials' resources in order to focus on other aspects of the important effort to limit spread of this new disease. Listing is voluntary and compliance with EPA's "emerging viral pathogen" guidance for antimicrobial products is verified by CBC. CBC will be working with federal and state officials to disseminate the list and make it accessible to all those who need to be in the know.

ⁱ To include a product on CBC's list of Coronavirus-Fighting Products, registrants of the products should please contact Ms. Komal K. Jain at

komal_jain@americanchemistry.com. Please also refer to CBC's Frequently Asked Questions guidance at <https://biocides.americanchemistry.com/CBCs-List-of-COVID-19-Fighting-Products-FAQs.html>
